

Abstract of the Disclosure

1 Whenever a player achieves a predetermined combination of
2 playing cards or slot symbols on a gaming machine or on a
3 random basis determined by the gaming machine, the ticket
4 printer on the gaming machine would print out for the player a
5 keno ticket, a lottery ticket, a sweepstakes ticket, an entry
6 into a prize contest, a redeemable coupon or other valuable
7 printed award. Alternatively, the gaming machine could be
8 configured to have real time access to the world wide web.
9 The player can then redeem his prize award from a group of
10 prizes that can be displayed to the player.
